This collection of information is required by 37 CFR 1.5. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to 2 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Applicant : Henry Michaels Beisner
Appl. No. : 10/640,624
Filed : 08/13/2003
Title : Adaptive Filter to Reduce Multipath
Grp./A.U. : 3662
Examiner : Brian K. Andrea

Honorable Commissioner for Patents

Washington, DC 20231

AMENDMENT

Sir:

Please amend the above identified application according to the enclosed clean copy of the Amended Specification. Also enclosed is a marked up copy with deleted material underlined and added material bracketed { }. In addition, enclosed is a reference: the book entitled "Digital Signal Processing" by Monson H. Hayes, a Schaum's Outline by McGraw-Hill 1999. Also enclosed is the reference: "An Algorithm for Least-Squares Estimation of Nonlinear Parameters," by D. W. Marquardt.

The claims have been renumbered 1 - 6, in keeping with the examiner's paragraphs 1. and 2.

In paragraph 3, the examiner says that essential matter cannot be incorporated by reference. All references are non-essential. The examiner says that non-patent literature may not be incorporated by reference. The MPEP does not say this.

The language of the examiner in paragraphs 5 and 9 is incomprehensible because it is contradictory. In paragraph 5, the examiner says, "the specification is enabling for the language: a whitening filter with complex coefficients ... and an array of complex delay-Doppler shift coefficients, ... producing a residual ...", yet, in paragraph 9, he says, "the language: a whitening filter with complex coefficients ... and an array of complex delay-Doppler shift coefficients, ... producing a residual ... is incomprehensible," and, therefore, not enabling.

In paragraph 5, the examiner says, "the specification does not provide enablement for the language: a communication system comprising a radio transmitter transmitting a signal which is interfered with by fixed reflectors and moving reflectors, said system comprising an antenna, a receiver and a multipath reduction subsystem ...", yet, in paragraph 9, he says, "the language: a communication system comprising a radio transmitter transmitting a signal which is interfered with by fixed reflectors and moving reflectors, said system
